plant care

"I never thought I'd be baking pies with apples from my own trees..."

lawnco

managing the health
of your plant life
for years of beauty

Your landscape is literally alive, changing from season to season. Lawnco understands that the growth and maturation process is dependent on variables such as weather, placement within the environment and human intervention, so we have dedicated personnel who will nurture and guide your plants and gardens. Awe-inspiring landscapes don't just happen, they are created by knowing and caring individuals.

spray applications

One of the best things you can do to ensure the steady health and growth of your plants is to nourish them and protect them from disease. Lawnco has scheduled applications of fertilizers, fungicides and insecticides that will promote growth and inhibit disease and insect infestation, allowing your landscape to achieve its full potential. Often neglected trees, plants and gardens may be revitalized with a dose of attention and the proper feeding.

maintenance

Lawnco will keep your landscape looking its best by performing necessary maintenance. Trimming, pruning, mulching and shaping each have an optimum window of opportunity which will foster new growth, increase blooms or deter spreading. Let our years of experience and plant specific knowledge determine a schedule of maintenance to produce results you will adore.

Keep your landscape happy and healthy. Just give us a call and we will be more than happy to schedule a consultation to discuss the needs of your landscape and how we can help. **502 423 9297**
